

Customized solutions for project logistic with own equipment on rail and road

Our services and activities

- Project handling „all-around carefree package from one source”
- Heavy and special transports
- Own heavy load axles and escort vehicles
- Own special railcars with tool and gear and escort railcars
- Transport studies and advice for optimal transport route
- Charter service (Sea / Air / Barge)
- Import / Export handling - AEO certified
- Organization and execution of transports of all dangerous goods classes (class 1 – 9)
- Security transports and support vehicles
- Transport insurance

Our transport equipment

- Combinable for road and rail
- Transport of heavy cargo (transformers, generators, turbines etc.) on road and rail
- Change of mode of transport
- Modular axles and trailers
- Various types of railcars
- Comprehensive range of additional equipment

Heavy-load modules

- 2- to 6-axles modules available and can be variously combined
- Usable as self-propelled or with tractor unit
- Parallel coupling in lateral direction
- Constructional systems combinable with rail equipment
- Numerous additional equipment - also available for rail transport
- Schnabel cars and trailers up to 500 tons payload
- Load-through beams up to 380 tons payload
- Low-bed trailer, gooseneck trailer, girder bridge and semi low-loader available

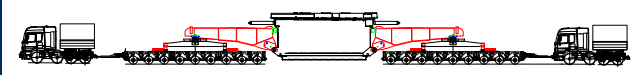

Rail equipment

- Numerous special railcars available: with and without special fittings
- Axle types 2-, 4-, 6-, 8-, 10-, 12-, 16-, 20-, 24-, 32-axles
- Payload up to 450 tons

Transshipment procedures

- Reloading at place of transshipment or arrangement of provisional place of transshipment
- Transshipment by various methods

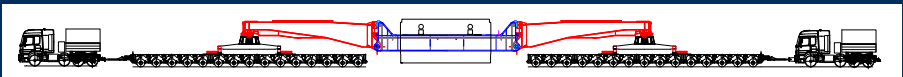

Examples of arrangement

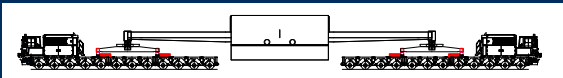

Heavy duty tractors, 2x9 heavy-load axles with self-supporting cargo in Schnabel trailer

Heavy duty tractors, 2x10 heavy-load axles with Schnabel trailer and generator in a low-bed

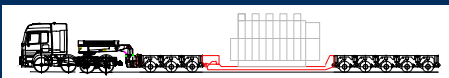

Heavy duty tractors, 2x16 heavy-load axles, heavy cargo in load through beams

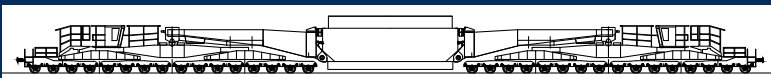

Self-propelled units with 2x12 heavy-load axles and generator in a transport beam

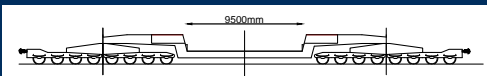

Gas turbine loaded on self-propelled unit on platform with 20 heavy-load axles

Heavy cargo on low-loader between 3- and 5-heavy-load axles

Heavy cargo in load through beams on 32-axles railcar

Low-bed on a 16-axles railcar

Project handling

all-around carefree package from one source

- **Planning and organization** of your project
- **Transport packaging** und **marking work**
- Preparation of **transport studies**
- **Route surveys** and planning of optimal routing
